Fourteenth Annual Report of the West End Nursery and Infants' Hospital

Jan. 1, 1896, Jan. 1, 1897

Incorporated Jan. 19, 1881

Thomas Morgan Rotch, Jr. Memorial Hospital for Infants.

The purpose of this circular letter is to awaken an interest in the work which the Thomas Morgan Rotch, Jr. Memorial Hospital for Infants has arranged to carry on, and to this end the following brief statement has been prepared.

It is proposed to erect a new hospital of the most modern type and equipped to produce the best results in the care of infant life

1. Provision will be made for the care of premature babies, in a room especially constructed for this purpose.

2. A milk laboratory with its milk supply from a special farm, will be established in the hospital.

3. A model lecture room will be equipped with apparatus for illustration, so that instruction can be given to mothers of all classes, whether rich or poor, and to the undergraduates in girls' schools, in the handling of well babies, their bathing, food, general hygiene, and what should be known in regard to directing and keeping control of nursery maids.

4. The hospital will have a model nursery, where nursery maids will be trained in the care of well babies, and to obey as servants, and also, to work under the trained graduate nurse, when the babies are sick.

5. A graduate course will be given to a certain number of trained nurses, who, having already received their diplomas from other hospitals, may wish to take a special course in the nursing of infants.

6. Another important feature of this work will be the District Supervision of the babies in their homes, after they have left the hospital. In order to do this, a trained nurse, with the aid of nursery maids will see that the babies are kept clean, have proper hygienic surroundings, and have dispensed to them absolutely pure milk, prepared from the prescriptions of physicians' who are skilled in the most modern methods of infant feeding.

The land on which this hospital is to be built has been paid for, and is located in the midst of healthy surroundings directly next to the new buildings of the Harvard Medical School. If the new hospital can be erected in this location the babies can be cared for in the hot summer months as well as during the winter months, this at present being impossible on account of the present old hospital being situated in the midst of surroundings unfit for hospital use.

The especial need now is to raise a sufficient sum, by annual subscriptions or by donations, to establish an assured income. If this can be accomplished there is no doubt but that the building fund can easily be increased sufficiently to authorize the immediate erection of the new hospital.

The present hospital is entirely inadequate. The building now in use, is becoming almost uninhabitable; the floors have begun to give way, and the building throughout is unfitted for this great charitable work. Will you not help us?

The West End Nursery and Infants' Hospital is a hospital devoted to the medical and surgical treatment of infants.

The patients taken care of in the Hospital wards are under two years of age. Older children under twelve years of age are treated in the Out-patient Department.

A Post-graduate course of instruction for nurses is given at the Hospital by the Hospital Staff.

Relatives are admitted to the wards on Sunday from eleven to one o'clock.

Visitors to the Hospital are requested to come on Tuesday mornings from ten to twelve o'clock.

REPORT OF THE TREASURER.

During the year 1896 the Hospital has received several large gifts and bequests, which were set apart for investment.

On February 6 we received the sum of $3,000 from Mr. David W. Hitchcock, as a gift from his wife in accordance with her request made just before her death.

On February 15 we received from Mr. Joseph B. Glover (as residuary legatee under the will of Albert Glover) the sum of $1,000, which has been made a part of what is hereafter described as the Permanent Fund.

On April 21 we received from the executors of the late Samuel E. Sawyer, of Gloucester, the sum of $207.33 in addition to the bequest of $2,000 received in 1895.

On July 27 we received as a bequest, under the will of the late Benjamin P. Cheney, the sum of $2,000, which was made a part of the Permanent Fund.

Under the will of Thomas T. Wyman, of Boston, a bequest of $20,000 was left to the West End Nursery and Infants' Hospital. This has not yet been received; but the contest over Mr. Wyman's will has been settled, and we have every reason to believe the money will eventually be paid to us.

The importance of having a large invested fund for the Hospital, on the income of which we can depend, needs no argument. It has therefore seemed best to set aside for investment, so far as possible, the larger gifts and bequests, even though no such condition accompanied them. The Treasurer has established a fund to be called the Permanent

Fund, and has placed in this fund certain of the larger gifts to the Hospital. He has also transferred to it what was formally known as the A. B. Fund. The A. B. Fund (referred to in the Treasurer's last report) was made up of certain contributions, amounting in all to $1,300, from an unknown source (the giver calling himself or herself A. B.), received by the Hospital some years since.

There are certain bequests to the Hospital to which conditions are attached which it has seemed best to keep as separate funds.

It is to be hoped that not only will the Permanent Fund be largely increased by bequests, but that the smaller donations and gifts will be so generous as to make it possible to transfer from a surplus in the Treasury from time to time to this Permanent Fund.

The Permanent Fund to-day, estimating the value of its investments and adding the money on hand belonging to this fund and yet uninvested, is about $4,525. The other funds of the society to which conditions are attached, and the income of which only can be used, are as follows:—

The Ellen A. Gifford Fund, being a bequest of $5,000 from Mrs. Ellen A. Gifford, of New Haven, received in 1890.

The Samuel E. Sawyer Fund, being a bequest under will of the late Samuel E. Sawyer, of Gloucester, of $2,000, to which a certain amount of interest is added.

The Mrs. David W. Hitchcock Fund of $3,000 referred to above.

The valuation of these funds, added to the estimated value of the Permanent Fund, makes the total sum invested, or in our hands for investment, approximately $14,350.

When we shall have received the Wyman bequest of

$20,000, and a bequest of $2,000 (which we have just been notified of) under the will of Mrs. F. W. Palfrey, our invested funds, including money to be invested, will be something over $36,000.

The income from investments, including interest on deposits during 1896, amounted to $590.01. The coming year the income from these sources will be larger; but, even after the receipt of the Wyman legacy of $20,000 and the bequest from Mrs. Palfrey, the income from investments will be but a small matter as compared with the regular expenses of conducting the Hospital. The receipts from annual subscriptions (on which we can depend with some degree of certainty) were, for 1896, $2,562. Adding this sum to the income from investments, we yet have a sum so small as to leave us still principally dependent on donations and entertainments for sufficient money to meet the annual expenses of the Hospital.

The balance of cash in the treasury Jan. 1, 1896, all of which was applicable to the payment of running expenses, was $1,982.98. The balance of cash in the treasury on Jan. 1, 1897, was $2,614.60. Of this $709.77 belonged to the funds of the Hospital, and is to be invested, while $1,904.83 is applicable to the payment of expenses. The cost of maintaining the Hospital for the year 1896 was $9,566.61. This sum does not include the large bills contracted in December last for the enlargement and changes being made on the first floor of the Hospital, which have not yet been paid.

It may be well to note that the Dispensary, which has been kept open during the whole year and has done so large a work (as shown by the Medical Report), has received from the sale of drugs sufficient to defray the expenses of this department of the Hospital.

The Treasurer is pleased to report that on January 1 he received an anonymous gift of $700, and on January 2 an anonymous gift of $400. This money comes to the Hospital free of all conditions.

All subscriptions and donations should be sent to the Treasurer at the West End Nursery and Infants' Hospital, 37 Blossom Street, Boston.

REPORT OF THE MEDICAL DIRECTOR.

January, 1896, to January, 1897.

During the past year the total number of admissions to the Hospital has been 134. There have been 40 deaths. Following the rule that the younger the individual the lower the vitality and the higher the mortality rate, the large number of deaths can be partially accounted for.

We should also consider that infants as a class are kept from the Hospital in their homes until they are much more reduced by disease than is the case with older people, and often are brought to the Hospital simply to die. No patient is refused entrance because it cannot live, but only when it is evident that its disease is of a chronic character, and consequently its admission would prevent the admission of an acute or curable case.

In accordance with the broad educational policy in conducting the Hospital approved of by the Directors during the past year, a lecture-room which can seat 150 people has been added to the Hospital.

The purpose of this room is for advancing all knowledge in connection with infants and children by the instruction of physicians, medical students, nurses, and all classes of women, the rich as well as the poor.

It is to be hoped that this purpose of extending the benefits of the Hospital to all classes may meet with the approval of the friends and benefactors of the Hospital.

The policy of the Hospital in regard to especially devoting its teaching to graduate nurses has proved so successful that it will be continued in the coming hospital year from October to June.

The value of any training school, both to itself and to the public, must be marked chiefly by the standard which it is able to set upon its requirements for admission and graduation. Especially is this true of a school drawing its pupils from graduates who have already devoted considerable time to fitting themselves for their work, and naturally feel loath to give up still more time for further preparation, unless the advantages to be gained are evident, and the course of training short and concentrated.

Bearing this in mind, we feel that we have reason to be gratified that the School connected with this institution has been able, in the two years since its inception, to justify its existence in such a conclusive way.

The course of instruction, slightly modified from its original scope, is now laid down on definite and satisfactory lines; and the fact that the waiting list of applicants is already of considerable length establishes beyond question the power of the school to attract the class of graduates most desired.

For any information as to requirements for admission, and as to the privileges and duties of pupils, application should be made to the Director of Nurses, Miss C. W. Cayford, 37 Blossom Street, Boston.

Since the opening of the School in February, 1895, eighteen nurses have received diplomas.

In accordance with the policy of the Directors of our Hospital who desire to further all knowledge connected with infants and children, and in compliance with the request of

the managers of the Training School of the Children's Hospital, it has been decided to experimentally give instruction to their nurses in the third year of their course. The diploma of the Infants' Hospital is, however, only given to graduate nurses.

The instruction in the graduate school is given by means of lectures, recitations, and practical instruction in the wards and Out-patient Department.

THE OUT-PATIENT DEPARTMENT

Is a very important feature of the Hospital.

Medical and surgical cases not requiring hospital care are received for treatment daily from 9 to 11 A.M. (Sundays and holidays excepted). Cases for admission to the Hospital should be referred to Out-patient Physician during these hours.

Emergency cases will be admitted at any time if there is an existing vacancy. Questions in regard to such cases, and other matters for information, may be referred by telephone to the Hospital at any time.

The following tables represent the Medical and Surgical work done in the Out-patient Department:—

I give and bequeath to the West End Nursery and Infants' Hospital the sum of .... dollars, to be applied to the uses of the Institution.

Fifteenth Annual Report of the West End Nursery and Infants' Hospital

Jan. 1, 1897, Jan. 1, 1898.

Incorporated Jan. 19, 1881.

There will be graduated in April the first class of Nurse Maids (numbering twenty) who will have then finished a course of ten months' training. During this course they are taught the care of well children (including simple kindergarten), washing and sewing, and they also have some experience with sick infants.

The training has been carried out under the supervision of the Director of Nurses of the Infants' Hospital; the actual teaching being in the hands of the matrons of the following Day Nurseries:

Mrs. Shaw's Nurseries:—

Ruggles Street Nursery. Cottage Place Nursery.
Albany Street Nursery. Cambridgeport Nursery.

Sunnyside Day Nursery.
Tyler Street Day Nursery.

Part of the ten months is spent at the Summer Hospital at Rainsford Island. There are in the Nurse Maids' Home, adjoining the Infants' Hospital, accommodations for fourteen Nurse Maids while six live at the Day Nurseries.

There will be maintained in connection with this School a Registry at 37 Blossom Street, where application may be made either by telephone or mail for information in regard to the Nurse Maids and photographs of the individual ones may be seen. In case a Nurse Maid is engaged through the Registry a fee of one dollar will be charged.

The wage limit for the first year has been fixed at five dollars per week. It is hoped that all persons interested in this work will kindly recommend to the School, girls desiring to have such instruction as is here offered.

GERTRUDE L. STOREY,
Chairman of Nurse Maids Committee.

INCORPORATED JANUARY 19, 1881.

Press of David Clapp & Son.

The West End Nursery and Infants' Hospital is a hospital devoted to the medical and surgical treatment of infants.

The patients taken care of in the Hospital wards are under two years of age. Older children under twelve years of age are treated in the Out-patient Department.

A Post-graduate course of instruction for nurses is given at the Hospital by the Hospital Staff.

Relatives are admitted to the wards on Sunday from ten to twelve o'clock.

Visitors to the Hospital are requested to come on Tuesday mornings from ten to twelve o'clock.

REPORT OF THE TREASURER.

Your Treasurer, in his account for 1897, has separated from other receipts, money received as legacies under wills, together with any money specifically given to be invested in the Permanent Fund. These other receipts are from annual subscriptions, donations, entertainments, income from investments, &c., and for convenience may be called income; but it would not be safe to consider this an income on which the Hospital can depend, since there is included in these receipts certain exceptionally large donations, and money received from entertainments. On the other hand there is a certain amount of income belonging to 1897, which having been received or collected after January 1, 1898, has gone into the receipts of 1898.

Speaking roughly, we can say that the income of the Hospital for 1897 was $10,165.02, which amount falls short of expenses for the year. There was to the credit of income, however, January 1, 1897, $1,904.83, which added to the income for 1897 makes the sum of $12,069.85, which still leaves a balance to the credit of income on January 1, 1898, of $92.38.

It is to be noted that among the expenses of 1897, were repairs, and extensive alterations amounting to $1,780.49. We probably shall not again have to meet so large an outlay of this kind for some years.

The house No. 1 Seabury Place was bought in May last for a Nurse Maids' Home. The cost of this house, together with the re-

pairs, furnishings, &c, and also the painting of the outside of the main Hospital building (amounting in all to $7,996.95) is not included in the running expenses of the Hospital for the year 1897, but this sum of $7,996.95 will be paid (subject to the approval of the Directors) out of the legacies received in 1897. These legacies appear in the report. The investments already made of money received from these legacies are for the Permanent Fund.

All subscriptions and donations should be sent to the Treasurer at the West End Nursery and Infants' Hospital, 37 Blossom Street, Boston.

N. S. BARTLETT,
Treasurer.

REPORT OF THE MEDICAL DIRECTOR.

JANUARY 1, 1897, TO JANUARY 1, 1898.

During the past year the Directors of the Infants' Hospital have completed the organization of all the work which reasonably may be expected to emanate from an institution devoted to the care of infants and children.

This work comprises the care of sick infants in the wards, of sick children in the out-patient department, the training of graduate nurses, the completion of the training of the nurses from the Children's Hospital, and finally the direction of the training of nurse maids.

In the summer of 1897 the City of Boston again placed the hospital at Rainsford Island under the care of the Medical Director. In this way the City has generously and wisely provided for a class of cases which our Hospital, on account of its location, is not fitted to look after during the hot weather. There were admitted to the Summer Hospital 124 cases with 35 deaths. The admissions to the wards of our Hospital during the year were 136; the deaths were 32.

The following tables represent the Medical and Surgical cases treated in the wards:

THE OUT-PATIENT DEPARTMENT.

This is a very important feature of the Hospital.

Medical and surgical cases not requiring hospital care are received for treatment daily from 9 to 11 A. M. (Sundays and holidays excepted). Cases for admission to the Hospital should be referred to Out-patient Physician during these hours.

Emergency cases will be admitted at any time if there is an existing vacancy. Questions in regard to such cases, and other matters for information, may be referred by telephone to the Hospital at any time.

Miss Gertrude L. Storey.

REPORT OF THE TREASURER.

The Treasurer, in submitting his report, would call attention to the income for the past year ($14,411.48) as compared with the cost of maintaining the hospital ($13,938.46), showing a small balance on the right side of the account. It is to be noted, however, that of the amount belonging to income on hand January 1, 1899, $343.90 belongs to a special subscription collected for the purpose of defraying the salary and expenses of the matron of the Nursery Maids Department; so that there was on hand on January 1, 1899, $222.50, applicable to the general expenses of the Hospital.

The amount received as income from the invested funds is comparatively little, and the Hospital must depend principally, as heretofore, on yearly subscriptions, donations and sums received from entertainments. It would be a great help to those having the management in charge, if yearly subscribers, and those who propose to give money for the support of the Hospital in 1899, would send their subscriptions at as early a date as possible.

No legacies or bequests have been received during 1898, with the exception of a donation from an unknown giver "A. B." who has sent $100.00 for the Permanent Fund. This friend of the Hospital has given us money in the past, in all $1400.00, and in a communication received from "A. B." it was stated that the placing of the money subscribed in the Permanent Fund was in accordance with the wishes of the giver, provided that if the Hospital be given up, the money subscribed by "A. B." be given to a similar charity on the same terms, that is, that the principal be invested and only the income used.

Friends of the Hospital will please send their donations and subscriptions to the Treasurer, West End Nursery and Infants' Hospital, 37 Blossom St., Boston.

N. S. BARTLETT,
Treasurer.

REPORT OF THE MEDICAL DIRECTOR.

JANUARY 1, 1898, to JANUARY 1, 1899.

During the past year the work which had been organized in the previous year has been tested in its details, and found to practically cover the demands which are made on an institution devoted to the care and interests of infants and children. In the wards of the Hospital, fifty-nine cases more than in the previous year were treated; there were forty-two deaths.

The Medical Director wishes to recognize the work done by Dr. Robert W. Lovett, by the assistant physicians, Dr. A. H. Wentworth, Dr. John Lovett Morse, Dr. John W. Bartol and Dr. John W. Coolidge, and by the assistant surgeons, Dr. Augustus Thorndike, Dr. John Dane and Dr. James S. Stone; also the services of the gentlemen who have worked in the special departments.

During the past summer the City of Boston again placed under the direction of the Medical Director the Hospital at Rainsford Island, and the work done by this Hospital in connection with the Out-patient Department of the Infants' Hospital has proved to be of increasing value to the community; twenty-eight more infants were received and treated than in the previous year, making a total of 152 admissions, and efficient work was done by the resident physician, Dr. Joshua C. Hubbard, and the wharf physician, Dr. Joseph B. Howland.

The Directors offer their sincere thanks to the City of Boston for the wise and practical co-operation of its officials which has enabled the Medical Director to care for a class of patients which otherwise could not have been looked after during the summer months.

The opportunity to perfect the Training School for Nursery Maids by using the wards of the Summer Hospital has been much appreciated by all who are interested in the prophylactic care of young children.

The following tables represent the Medical and Surgical cases treated in the wards.

THE OUT-PATIENT DEPARTMENT.

This department of the Hospital is increasing every year in importance and usefulness, and is practically self supporting. During the past year there were over ten thousand visits, including over two thousand new patients.

Medical and surgical cases not requiring hospital care are received for treatment daily from 9 to 11 A. M. (Sundays and holidays excepted). Cases for admission to the Hospital should be referred to the Out-patient Physician during these hours.

Emergency cases will be admitted at any time if there is an existing vacancy. Questions in regard to such cases, and other matters for information, may be referred by telephone to the Hospital at any time.

The following tables represent the Medical and Surgical work done in the Out-patient Department: —

The training schools connected with the Hospital have provided the public with an efficient though necessarily limited number of graduate nurses and nursery maids. The demand for the latter class of nurses has been far beyond the number which the school could provide, applications coming from families even at such long distances as New York.

It is evident from the long waiting list of those who wish to obtain trained nursery maids that this part of the Hospital work is successful and much needed. It is with regret that we record the death of one of our valuable trained graduate nurses, Miss Mathewson, who while on duty at the Hospital was attacked with measles and died from a complication connected with the ear.

The following is the list of those graduate nurses who have taken the diploma of our Hospital since the training school was started in 1895.

Margaret H. Brown, Massachusetts.
Nora F. Donavan, Ireland.
Della Honan, Ireland.
Nora Canty, Ireland.
Jane Andrews, England.
Annie M. Conlon, Massachusetts.
Sarah McLane, Scotland.

It is with sincere regret that we have to announce the resignation of Miss Mary F. Bartlett and Miss Elizabeth P. Cordner from the House Committee; their work from the time when the Hospital was reorganized in 1895 has been most admirable and systematic; they well deserve the thanks of all connected with the Hospital.

The Directors wish to express their appreciation of and thanks for the arduous work done by the ladies connected with the theatricals and with the fair given at the Vendome, and to acknowledge the aid which the receipts from these entertainments have been towards paying the current expenses of the year.

The Directors also tender their thanks to the Ladies' Aid Society and to the Director of Nurses, Miss Cayford; especial recognition and appreciation should be made of the unusual amount of work which has been done by Miss Aubin during the summer in both Hospitals.

T. M. ROTCH,
Medical Director.

OF THE

WEST END NURSERY AND INFANTS' HOSPITAL.

JANUARY 1, 1899, TO JANUARY 1, 1900.

BOSTON:
Press of David Clapp & Son.

The West End Nursery and Infants' Hospital is a hospital devoted to the medical and surgical treatment of infants.

The patients taken care of in the Hospital wards are under two years of age. Older children under twelve years of age are treated in the Out-patient Department.

A Post-graduate course of instruction for nurses is given at the Hospital by the Hospital Staff.

The Hospital, in connection with Mrs. Shaw's Day Nurseries, gives a course of instruction to Nursery Maids.

Relatives are admitted to the wards on Sundays from ten to twelve o'clock.

Visitors to the Hospital are requested to come on Tuesday mornings from ten to twelve o'clock.

REPORT OF THE TREASURER.

THE Treasurer, in submitting his report, is pleased to find that the income for the year 1899 exceeds the expenditure by the sum of $977.37, and this added to the balance of income on hand January 1, 1899, which was $565.40, makes a balance applicable to the running expenses of the Hospital of $1542.77.

A certain amount of the income on hand January 1, 1899, as noted in my report of that date was to be used for the maintenance of the Nursery Maids Training School. We have also received during the year 1899 certain donations, and certain receipts from the Day Nurseries and from wages and fees for this special purpose. We have kept a careful, but necessarily approximate, account of the expenses of the School, and find that its cost for 1899 has exceeded the amounts referred to as being on hand at the beginning of the year, and received during the year, by $532.52.

The Treasurer regrets to say that no bequests have been received during the year.

There have been received as donations to the Permanent Fund, as shown in detail in the report, $320.00.

Subscriptions and donations should be sent, as heretofore, to the Treasurer, at the Hospital, 37 Blossom Street, Boston.

N. S. BARTLETT,
Treasurer.

REPORT OF THE MEDICAL DIRECTOR.

JANUARY 1, 1899, TO JANUARY 1, 1900.

During the year 1899 a number of changes in connection with the details of the Hospital management were found necessary on account of their being no provision for the care of the patients during the summer months.

Instead of the Hospital being closed from June to October, it was found necessary to keep it open in June, in order to give as much relief as possible to the sick infants for whom no provision could be made, excepting in the Hospital wards on Blossom St.

The locality of the Hospital has so often been proved a bad one for the care of infants in the hot weather, that it was deemed wise to close the wards in July, August and September.

It is very evident, therefore, that one of the great needs of the Hospital is a summer hospital to which the patients can be transferred in June.

The number of patients admitted to the wards was greater than in 1898, the increase being in the number of medical cases, which was in all forty-three more cases than in the same number of months in the preceding year, and a total of fifty-four when the additional month of June was included.

A great improvement has been made in the accommodations for the surgical patients, there now being a large sunny ward with room for one more bed than was possible with the former arrangement of two small wards.

A very notable feature connected with the financial condition of the Hospital was the fair given by the ladies of the Auxiliary Committee; it was a most remarkable success, reflecting the greatest credit on the energy and untiring work done by this com-

mittee. The Directors wish to present their thanks to all connected with this work, and to emphasize their appreciation of the executive ability of the officers of the committee, which resulted in such a practical way for the good of the Hospital as a whole, and enabled us to keep the Hospital open an extra month in the year.

During the past year the supervision of the household details has been most efficiently carried on by Mrs. Hamilton Perkins, to whom we are greatly indebted, in many ways connected with the welfare of the Hospital. For the past few months Mrs. P. C. Severance has been added to the House Committee, and she will continue to aid Mrs. Perkins during the coming year.

To the ladies connected with the Ladies' Aid Society, we return most grateful thanks for the work which they always do so well, and for the interest which they so practically show for the Hospital and all connected with it.

The work of the Committee on Nursery Maids is especially to be commended, for the ladies on this committee have been untiring in the performance of their duties, and by giving an entertainment have aided in helping the financial resources of the Hospital.

On behalf of the Directors the Medical Director wishes to especially signify his appreciation of the careful and arduous work done by Dr. R. W. Lovett, Dr. A. H. Wentworth, Dr. John Lovett Morse, Dr. John W. Bartol, Dr. J. N. Coolidge, Dr. Augustus Thorndike, Dr. John Dane, and Dr. James S. Stone.

The work in the Out-patient Department is especially trying. Owing to the contracted quarters and increasing number of patients, there is great need of more room in this department as well as throughout the whole Hospital.

The thanks of the Directors are also tendered to the physicians who have been giving their services in the special departments.

It is with profound regret that we have to record the death of one of our consulting physicians, Dr. Francis Minot. Dr. Minot had been connected with the institution since it was first opened as a hospital.

The following table represents the Medical and Surgical cases treated in the wards.

THE OUT-PATIENT DEPARTMENT.

This department of the Hospital is increasing every year in importance and usefulness, and is practically self-supporting. During the past year there were over eleven thousand visits, including over two thousand new patients.

Medical and surgical cases not requiring hospital care are received for treatment daily from 9 to 11 A. M. (Sundays and holidays excepted). Cases for admission to the Hospital should be referred to the Out-patient Physician during these hours.

Emergency cases will be admitted at any time if there is an existing vacancy. Questions in regard to such cases, and other matters for information, may be referred by telephone to the Hospital at any time.

The following tables represent the Medical and Surgical work done in the Out-patient Department:—

The training schools connected with the Hospital have provided the public with an efficient though necessarily limited number of graduate nurses and nursery maids. The demand for the latter class of nurses has still been far beyond the number which the school could provide, applications coming from families at long distances.

There is a long waiting list of those who wish to obtain trained nursery maids.

The following is the list of those graduate nurses who have taken the diploma of our Hospital since the training school was started in 1895.

LIST OF GRADUATES.

The Directors wish to express their great regret that Miss Cayford, now Mrs. H. L. Burrell, had to withdraw from her position as Director of Nurses; her services extending over four years were marked by so much intelligent, good and faithful work that too much commendation cannot be given to it. She, in addition to her own especial work, did much to aid in and perfect the Hospital organization, including the two schools for nurses.

Miss M. A. Jones, who has taken Miss Cayford's place, has carried on the year's work in the most efficient and satisfactory manner.

To Miss Aubin are due the thanks of the whole Hospital management for the way in which she has performed the many different duties which are entailed upon her in her position of Assistant Secretary.

T. M. ROTCH,
Medical Director.

West End Nursery and Infants' Hospital.

January 1, 1900, to January 1, 1901.

BOSTON:
Press of David Clapp & Son.

The West End Nursery and Infants' Hospital is a Hospital devoted to the medical and surgical treatment of infants.

The patients taken care of in the Hospital wards are under two years of age. The admission of patients is not confined to residents of Boston or vicinity. Older children under twelve years of age are treated in the Out-patient Department.

A Post-graduate course of instruction for nurses is given at the Hospital by the Hospital Staff.

The Hospital gives a course of instruction to Nursery Maids, in the care of infants.

Relatives are admitted to the wards on Sundays from ten to twelve o'clock.

TREASURER'S REPORT.

The Treasurer, in submitting his report, wishes to call attention to the generous gift of Mr. Thomas W. Lawson of $5000.00. This amount has been placed in the Permanent Fund.

The Treasurer would also ask attention to the purchases made, with the approval of the Directors of the houses numbers 2, 3 and 4 Seabury Place. These properties are situated in close proximity to the Hospital, and just in the rear of our present Hospital building. Looking into the future, should we ever be in a position, as is hoped, to build a new and more commodious building, the land on which the houses purchased are situated would be necessary for our purpose. Meantime they may be considered as an investment, on which a reasonable return in income may be expected. The outlay for these houses has been charged to the Permanent Fund.

The friends of the Hospital will see from the Treasurer's report that the income for the year has not been sufficient to meet our expenses. Fortunately, we carried forward something from last year. We can only express the hope that our friends will give us all they can in the way of subscriptions and donations during the coming year, sending them, as heretofore, to the Treasurer, 37 Blossom Street, Boston.

N. S. BARTLETT,
Treasurer.

ELIZABETH P. CORDNER.

REPORT OF THE MEDICAL DIRECTOR.

During the year 1900 the especial work of the Hospital represented by the care of patients in the first two years of life, has not only been carried on satisfactorily, but has shown a considerable increase in the number of patients treated.

This increased growth and manifest substantiation of the need of especial care for sick infants have strongly impressed on those who are connected with the Hospital, how inadequate is the space and cramped are the quarters provided for this continually increasing demand for hospital care.

The Directors have considered the various means by which a place better suited and equipped for the Hospital work can best be obtained, and in common with many friends of the Hospital think that what the work needs, and is justified in having, is a larger Hospital arranged especially for the work which is demanded of it.

Various plans have been discussed, and it is at present the Directors' idea that the land on which the Hospital and the adjacent houses belonging to it stands should be utilized as the site for a new building; other plans are however being considered. With this idea in view, plans have been drawn by which the executive rooms, and the nurses' and servants' quarters, can be on the lower stories, and the wards above. In this way the sick infants could have fresh air at all times of the year, and could be received in the summer as well as in the winter. At present the wards, on account of the lack of sufficient air space and ventilation, have to be closed during the months of July, August and September.

The Directors feel, however, that in raising money with the intention of building a new Hospital adapted to the present needs of sick infants, funds should also be raised for endowment, and that such an endowment fund should come first in order to insure the successful administration of the institution.

The Directors, therefore, hope that all the friends of the Hospital will aid in still further amplifying the good work which has under such unfavorable surroundings been carried on for so long a period in the past, by actively bringing to the attention of the public the advisability of raising funds for the endowment and subsequent building. The schools for the graduate nurses and for nursery maids have been most successfully still further developed during the year; the latter School is at present carried on entirely within the Hospital walls, and there is an ever increasing demand for the nursery maids.

The members of the Medical and Surgical staff are offered the sincere thanks of the Directors for the extensive and arduous work which in very inadequate quarters, especially marked in the growing Out-patient Department, they have carried on through the year so successfully. New and sufficient quarters would nearly double the work, and yet enable the staff to do it better and far more satisfactorily.

Dr. Franklin W. White and Dr. Joshua C. Hubbard have been appointed members of the Hospital staff during the past year.

The Directors appreciate the time spent and the difficulties met with by the ladies connected with the different committees. They recognize the successful issue of the fair, and present their thanks to all connected with this work of raising money for the running expenses of the Hospital; these expenses have been less this year than in 1899.

To the members of the Ladies' Aid Society we return grateful thanks for their continued interest in the Hospital, and for the practical work which they are doing.

It is with great regret that we have to record the death of Mr. William Minot, one of the eight charter members of this Corporation; also the death of Mrs. W. P. Walley and Mrs. George P. Upham, both members of the Corporation.

During July and August, Mr. H. H. Hunnewell kindly sent every day fresh milk to be dispensed to deserving cases. This was a great help during the hot weather to the many poor women who find it difficult to get pure milk in this part of the city.

The following is the report of the Medical and Surgical work during the year: —

THE OUT-PATIENT DEPARTMENT.

This department of the Hospital is increasing every year in importance and usefulness, and is practically self-supporting. During the past year there were over eleven thousand visits, including over three thousand new patients.

Medical and surgical cases not requiring hospital care are received for treatment daily from 9 to 11 A. M. (Sundays and holidays excepted). Cases for admission to the Hospital should be referred to the Out-patient Physician during these hours.

Emergency cases will be admitted at any time if there is an existing vacancy. Questions in regard to such cases, and other matters for information, may be referred by telephone to the Hospital at any time.

The following tables represent the Medical and Surgical work done in the Out-patient Department: —

NINETEENTH ANNUAL REPORT

OF THE

WEST END NURSERY AND INFANTS' HOSPITAL.

JANUARY 1, 1901, TO JANUARY 1, 1902.

BOSTON:
Press of David Clapp & Son.

The West End Nursery and Infants' Hospital is a Hospital devoted to the medical and surgical treatment of infants.

The patients taken care of in the Hospital wards are under two years of age. The admission of patients is not confined to residents of Boston or vicinity. Older children under twelve years of age are treated in the Out-patient Department.

A Post-graduate course of instruction for nurses is given at the Hospital by the Hospital Staff.

The Hospital gives a course of instruction to Nursery Maids, in the care of infants.

Relatives are admitted to the wards on Sunday from ten to twelve o'clock.

TREASURER'S REPORT.

The total cost for maintaining the Hospital for the year 1901, including a considerable amount paid out for repairs on the Hospital, also taxes and repairs on the Seabury Place houses, and interest paid on mortgages, as shown by the Treasurer's report, amounts to $13,140.55. To which if we add premium on bonds, accrued interest and commissions paid, all of which we charge to income, the total amount paid out on account of income amounts to $13,464.39.

The income received from donations, yearly subscriptions, dispensary, interest on investments, &c., besides what was received from the Fair given in March, amounts to $12,964.28. The proceeds of the Fair held in December properly belongs with the 1902 income. The above stated income for the present year does not include one anonymous donation of $1,000.00, and does not include two large gifts from Mr. Thomas W. Lawson referred to hereafter. We had on hand, January 1, 1901, as income, $839.55. We have on hand, January 1, 1902, as income, including the proceeds of the December Fair, $4,658.92.

The Treasurer also received on account of the Mastin Sub-Division Loan Mortgage Bonds the sum of $556.00. These bonds are an investment of the Ellen M. Gifford Fund, and were held by the Hospital when the present Treasurer took office in 1894. Your Treasurer understands that the $556.00 is accumulated interest, and strictly belongs to income, but as the Mastin Sub-Division Loan Bonds show a considerable depreciation in value, this sum has been credited to principal of the Ellen M. Gifford Fund.

We have received during the year from Mr. Thomas W. Lawson the sum of $5,000.00, and from the New England Trotting Horse Breeders' Association, by arrangement with Mr. Lawson,

the sum of $4,049.31. These amounts have been placed in the Permanent Fund, as has also the anonymous gift of $1,000.00 referred to above.

We have also received from the estate of Mr. David W. Hitchcock the sum of $5,000.00, given with the condition that the principal shall be invested and the income only used. This amount has been added to the Mrs. David W. Hitchcock Fund and the fund will hereafter be called the Mr. and Mrs. David W. Hitchcock Fund.

We have also received from the estate of Miss Frances Mary Mackay the sum of $5,465.00 with the condition that it be separately invested and called the Frances Mary Mackay Fund, and the income only used.

The Permanent Fund was established in 1894 by the present Treasurer, and with the exception of a few small donations for permanent investment, and the gifts of A. B. (formerly called the A. B. Fund), the moneys placed in the Permanent Fund have been given without restrictions as to their use. As the gifts of A. B. have certain conditions attached to them, it seems best to separate the A. B. Fund from the Permanent Fund, and this has been done, and the A. B. Fund appears in the present report as a separate fund.

The mortgages on the real estate purchased by the Hospital have all been discharged with the exception of a mortgage for $3,500.00 on No. 4 Seabury Place.

REPORT OF THE MEDICAL DIRECTOR.

During the year 1901, the various branches of the work at the Hospital have been carried on most satisfactorily, and the impression has grown that there is great need in Boston of a Hospital especially constructed for the requirements of sick infants, and that this class of patients should be provided for.

It is also becoming more and more manifest, that a new Hospital should be built to take the place of the present old and inadequate quarters, where it is so difficult to carry on the work properly, and that the building should be on the site of the old Hospital, or, as has been brought to the attention of the Directors, in some place more on the outskirts of the city, where better air can be obtained, and where therefore the Hospital can be kept open during the months of June, July, August and September.

The wards on Blossom street were closed during these four months last summer, and the patients removed to Mr. James A. Garland's house at Hamilton.

It was possible to do this through the generous gift from Mr. Garland, not only of his house, which was peculiarly adapted to the care of sick babies, but also through funds which he provided for the expenses of the institution. The Directors offer their sincere thanks to Mr. Garland, and assure him that a great deal of good has been accomplished through his munificent gift.

Mr. H. H. Hunnewell kindly sent milk daily during July and August, which was of great help in the out-patient department.

The Directors, in offering their thanks to the Medical and Surgical staff for the work which they have so cheerfully carried on during the past year, assure them that they have borne in mind the necessity of enlarging the Out-patient Department, and that they are carefully considering the means by which this may be done.

To the members of the Ladies' Aid Society the Directors return grateful thanks for the practical work they have done, in supplying everything that was needed for the patients, and they also wish, in conveying their thanks to the ladies who have served on the various committees, especially the entertainment committee and the house committee, to impress upon them the fact that they appreciate the time and labor spent in securing funds sufficient to cover the expenses for the coming year.

The following is the report of the Medical and Surgical work during the year : —

THE OUT-PATIENT DEPARTMENT.

This department of the Hospital is increasing every year in importance and usefulness, and is practically self-supporting. During the past year there were over twelve thousand visits, including nearly three thousand new patients.

Medical and surgical cases not requiring hospital care are received for treatment daily from 9 to 11 A. M. (Sundays and holidays excepted). Cases for admission to the Hospital should be referred to the Out-patient Physician during these hours.

Emergency cases will be admitted at any time if there is an existing vacancy. Questions in regard to such cases, and other matters for information, may be referred by telephone to the Hospital at any time.

The following tables represent the Medical and Surgical work done in the Out-patient Department: —

TWENTIETH ANNUAL REPORT

OF THE

WEST END NURSERY AND INFANTS' HOSPITAL.

JANUARY 1, 1902, TO JANUARY 1, 1903.

BOSTON.
Press of David Clapp & Son.

The West End Nursery and Infants' Hospital is a Hospital devoted to the medical and surgical treatment of infants.

The patients taken care of in the Hospital wards are under two years of age. The admission of patients is not confined to residents of Boston. Older children under twelve years of age are treated in the Out-Patient Department.

A Post-graduate course of instruction for nurses is given at the Hospital by the Hospital Staff.

The Hospital gives a course of instruction to Nursery Maids, in the care of infants.

Relatives are admitted to the wards on Sunday from ten to twelve o'clock.

TREASURER'S REPORT.

During the past year no fair has been held for the Hospital, but in part as the result of two fairs in 1901, we carried forward on January 1, 1902, to the credit of income, $4,658.92.

The income for the present year is $7,608.58, making a total amount available for the running expenses of the Hospital $12,267.50.

The running expenses for the year, including interest on Seabury Place mortgage, and including $97.28 charged to income for commissions, accrued interest, premium on bonds, &c., as per detailed report, was $13,250.30, showing a deficit for the year so far as income goes of $982.80, which amount we have charged against the Permanent Fund.

We have received during the year a gift from A. B. for investment in the A. B. Fund, of $500, and a bequest of $5,000 under the will of Joseph B. Glover which we have added to the Permanent Fund.

REPORT OF THE MEDICAL DIRECTOR.

Under increasing difficulties caused by the continuous deterioration of the Hospital buildings from age, the work of the Hospital has been carried on during the year 1902.

It has become a grave question, as to whether the treatment of patients can much longer be of benefit to them, in the narrow, ill ventilated quarters, where for so many years poor babies from all parts of the city and state have been received and treated, by the most skilled nursing and efficient medical and surgical care.

The Directors are therefore hoping that some change can be made in the location of the Hospital buildings, and that for this purpose, money may be raised for a new building.

All friends, not only of the Hospital as an institution, but of sick babies in general, are therefore asked to interest others in the work which time has proved to be of the greatest practical utility to the city and state. At present the Hospital is without sufficient funds to carry out this idea of the Directors, that a new Hospital must be built, if the work of the West End Nursery and Infants' Hospital is to be continued.

It is evident that what is needed, are subscriptions to a Building Fund, and this the Directors confidently expect will be obtained in the coming year. Even if those already interested in the Hospital feel that they cannot aid financially in this undertaking themselves, yet they certainly can explain to others the great need in the community which an institution devoted to sick babies fills. It is probable that with a fund of fifty or sixty thousand dollars more than has already been subscribed, the Directors would feel that the Hospital could soon be built. Subscriptions to this Building Fund should be sent to Dr. Clarence John Blake, 228 Marlboro St., Boston, who is President of the Corporation and of the Board of Directors.

Owing to its unsanitary surroundings the Hospital had to be closed during the months of July, August and September, and as the Hospital could not afford to provide summer quarters for the babies, no care could be given to these little unfortunates during the summer months, and consequently many lives were lost.

The Directors offer their sincere thanks for the valuable work carried out during the year, to the Medical and Surgical Staff, to the Ladies Aid Society, to Mrs. SARGENT for milk sent from the Hunnewell Estate during the summer, and to the Ladies who have served on the various committees connected with the Hospital. They also wish to thank the officers of the Children's Mission for their kindly interest and cooperation in providing suitable places for our convalescent babies.

The Directors also wish to recognize the devoted services of Miss MARY A. JONES, Director of Nurses, and Miss HELEN W. AUBIN, Assistant Secretary.

The following is the report of the Medical and Surgical Staff for the year.

THOMAS MORGAN ROTCH,
Medical Director.

THE OUT-PATIENT DEPARTMENT.

This department of the Hospital is increasing every year in importance and usefulness, and is practically self-supporting. During the past year there were over eleven thousand visits, including over two thousand new patients.

Medical snd surgical cases not requiring hospital care are received for treatment daily from 9 to 11 A.M. (Sundays and holidays excepted). Cases for admission to the Hospital should be referred to the Out-Patient Physician during these hours.

Emergency cases will be admitted at any time if there is an existing vacancy. Questions in regard to such cases, and other matters for information, may be referred by telephone to the Hospital at any time.

The following tables represent the Medical and Surgical work done in the Out-patient Department:—

New patients treated from Jan. 1, 1902, to Jan. 1, 1903:

TREASURER'S REPORT.

As this is the first Annual Report of the Hospital under its new name, and as the change of name marks a change in the financial condition of the Hospital, it seems proper that some mention or record of these matters be made in the Treasurer's Report.

It has been recognized for several years past that the present quarters of the Hospital on Blossom St. were quite unsuitable for their purpose; that they were old, inconvenient, perilous in case of fire, and in short not in any sense what a modern hospital for infants should be.

Early in 1902 Dr. J. Collins Warren and our President Dr. Clarence John Blake undertook the task of getting subscribers to a fund for the erection of a new hospital for infants. Their efforts were most successful, and the fund collected which they now hold as Trustees amounted on January 1, 1904, to $77,364.99. Further subscriptions to this fund are desired and may be sent to Dr. Warren or to Dr. Blake.

The money collected by Dr. Warren and Dr. Blake, which has been called the Thomas Morgan Rotch Jr. Memorial Fund, was offered by them as Trustees to the West End Nursery and Infants Hospital on certain conditions; one condition being "that the corporation changes its name to, and maintains its name as the Thomas Morgan Rotch Jr. Memorial Hospital for Infants." Another condition provided "that the corporation under its new name build a hospital building on the ground owned by Harvard University, near to the new Harvard Medical School."

At a meeting of the Directors of the Hospital held on December 30, 1902, it waa voted to recommend to the Corporation the acceptance of the Thomas Morgan Rotch Jr. Memorial Fund under the conditions made by the Trustees. At a meeting of the Cor-

poration held January 7, 1903, the recommendation of the Directors was adopted and on April 18, 1903, the name of the Hospital was changed by act of the Legislature.

Though we have funds in the hands of Trustees for a new hospital building, this does not help matters as regards the necessary money to meet current expenses.

An examination of the Treasurer's account will show that the income for the year 1903 from annual subscriptions, donations, investments &c., was only a little more than half what was necessary to meet the expenses for the same period. We have again had to fall back on our Permanent Fund to provide for the deficiency.

It is hoped that during the present year our annual subscribers will be increased in numbers, that our donations will be larger, that the fair to be given in the spring will be a success, and, in short, that our friends will see to it that we have enough income in 1904 to pay the expenses of the year.

N. S. BARTLETT,
Treasurer.

REPORT OF THE MEDICAL DIRECTOR.

During the past year it has been brought to the attention of the Directors that in order to expedite the building of the new hospital a settled policy in regard to it should be determined upon. They have found that they can with the memorial fund which has already been given buy the land for a hospital in connection with the new medical school buildings and build a hospital under certain conditions. These conditions, however, necessitate building a hospital on a smaller scale than was at first intended.

Owing to the impression which exists in the community that the hospital has been endowed, the Directors wish to have it understood that there is no such endowment for the running expenses of the hospital, and that until such endowment is obtained, the hospital in its new building will have to depend for income on the same sources as has the old hospital, with the exception that when the patients have been transferred to the new hospital in the future, an extra income of a little over two thousand dollars a year for ten years has been promised.

The large deficit which appears in the Treasurer's accounts of over five thousand dollars arises from the attempt to run the hospital without the aid which in former years has come from holding some entertainment, such as a fair. The fair will be held this year as in former years, and it is hoped that the running expenses can then be covered. It is well to note that according to the Treasurer's report the running expenses of the hospital have been over two hundred dollars less than in the previous year, and the Directors feel much encouraged in their belief that the hospital is doing a much needed work among the sick poor, a work which should never be allowed to cease. Under these conditions it is especially to be impressed upon those who have the welfare and continuance of the hospital at heart to in every way encourage those who are undertaking to provide an entertainment fund to supplement the income, and also that they should endeavor to increase among their acquaintances the list of our annual subscribers. If this is done it is very probable that after a few years we shall own a model hospital and the land upon which it stands, and that we shall then be able to increase our means of providing funds for income by

endowment and by subscriptions coming from the increased interest which must necessarily arise when a hospital has been provided for sick infants worthy of the name of a hospital and not representing a few old buildings whose usefulness has long since been much interfered with by lack of proper sanitary conditions.

Through the expression of a desire on the part of the old friends of the hospital to retain for a time the old out-patient department on Blossom Street, it is possible that the large number of children whom we now care for in the West End will still be treated for a time even after the new hospital has been occupied.

It is to be noted as significant of the year's work that the Nursery-Maid school has increased in importance, and that it is more and more recognized by the community as of great value. Under more favorable conditions it will probably become self-supporting.

The Directors wish to thank the Ladies' Aid Society for the great aid which they have given to the hospital, and also to express their appreciation of the fine work done by the Medical and Surgical Staff.

The Directors also desire to express their thanks to Miss Mary A. Jones, Director of Nurses, and to Miss Helen W. Aubin, Assistant Secretary, for their efficient aid in the administration of the Hospital.

The following is the report of the medical and surgical cases in the wards and in the out-patient department during the year 1903.

THOMAS MORGAN ROTCH,
Medical Director.

THE OUT-PATIENT DEPARTMENT.

This department of the Hospital is increasing every year in importance and usefulness, and is practically self-supporting. During the past year there were over ten thousand visits, including over two thousand new patients.

Medical and surgical cases not requiring hospital care are received for treatment daily from 9 to 11 A.M. (Sundays and holidays excepted). Cases for admission to the Hospital should be referred to the Out-Patient Physician during these hours.

Emergency cases will be admitted at any time if there is an existing vacancy. Questions in regard to such cases, and other matters for information, may be referred by telephone to the Hospital at any time.

The following tables represent the Medical and Surgical work done in the Out-patient Department :—

THE TREASURER'S REPORT.

THE Treasurer in submitting his report calls attention to the receipts and expenditures for the past year, and regrets to say that there is an excess of expenditure over income of $1,204.58.

We have received from Mr. Thomas Minns, as executor of the estate of Robert Charles Billings, a bequest of $3,000, the condition of the bequest being that such sum shall be invested as the Robert Charles Billings Fund and the income only used for general purposes of the Hospital. This money has been invested.

Under the will of Mrs. Sarah E. Potter the Hospital is named as a beneficiary, and will later receive the sum of $10,000. As we also have an interest in the residuary of Mrs. Potter's estate, we expect to receive under her will a sum considerably larger than the amount just named.

The Hospital has also been named as a legatee in the will of Miss Mary McGregor Means, and we shall later receive $3000 from Miss Means's estate.

Under date of July 6th last, the Treasurer exchanged the three $1000 Mastin Sub-division Loan Bonds (or, to describe them more strictly, the three coupon promissory notes signed by the Mastins) for thirty shares in the Trust Property held under an agreement of trust for the protection and benefit of those who like the Hospital are interested as creditors in the Mastin property. The Trustees are Edward D. Codman and Moses Williams, Jr. The thirty shares of stock are in their hands, and the Treasurer holds their receipt for the same. This stock belongs to the Gifford Fund, and was one of the earliest investments of the Hospital.

N. S. BARTLETT,
Treasurer.

REPORT OF THE MEDICAL DIRECTOR.

Although the present Hospital has grown less and less fitted to meet the demands which the infants of the poorer classes are continually making on our care, yet it is gratifying to note that there are recorded 723 visits more than during the year 1903. 233 patients were admitted to the medical wards and 64 to the surgical, making a total of 297. In the out-patient department, 1903 medical patients came under our care and 631 surgical, amounting to 2640. The medical visits were 7606 and the surgical 4031, amounting to 11,637,—723 visits more than last year.

When we consider how very small and poorly ventilated are the rooms connected with our out-patient department, it is remarkable how much good has been done to the community and how many favorable results have been accomplished. The medical and surgical staff deserve the greatest credit for this work, which they are carrying on under the most adverse circumstances in their cramped quarters.

Eleven graduate nurses have received their diplomas during the year, and eleven nursery maids. Most favorable reports have been received from the families where the nurses are employed in regard to the kind of teaching which it is our endeavor to carry out in this school. The care and nursing of young infants is but slightly known by those nurses who take their diplomas in the schools connected with large hospitals, and consequently there is a great need of having these nurses receive post graduate instruction in the care of infants. It has freqnently during the year been reported to us that when our nursery maids have been employed in cases where a child being ill and a trained nurse engaged to take care of the child during this illness, that the nursery maid showed the result of her hospital training, in that she worked in harmony with the nurse who was over her. As is well known, this is not usually the case where the nursery maid has not been trained to work with the trained nurse. This lack of harmony and the great amount of friction arising in cases of this kind is conducive of detriment to the baby and of general discomfort to the family where the two nurses are employed.

We are looking forward to the time when in the new hospital, well equipped, properly ventilated and away from its present unhygienic surroundings, we can keep the wards open in summer. This we hope at no distant time to do, when the new hospital is built on land adjoining the Fenway.

Of especial importance in the construction of the new hospital will be a proper provision for the care of premature babies. There is no place at present where this class of cases can be intelligently treated, and yet there is no doubt that there is a great demand for especial nursing and for the best hygienic surroundings if the lives of these premature infants are to be saved.

The Directors especially wish to acknowledge the services of Dr. Roger Spalding in the Medical service and Dr. James R. Torbert in the Surgical service. They appreciate the difficulties which will always arise in these departments so long as patients have to be treated in the present quarters.

The thanks of the Directors are given to the Ladies who so successfully conducted the fair, and also to the Ladies' Aid Society, which has contributed so much to the supplies of the Hospital.

The administration of the Hospital has been faithfully carried out under the Director of Nurses, Miss Jones, and the Assistant Secretary, Miss Aubin, to whom especial thanks are due.

The Directors wish to especially draw attention to the fact that as the Hospital is largely supported by private contributions all those who have the welfare of the Hospital at heart should endeavor to increase the number of annual subscribers.

The list of diseases treated in the wards and out-patient department is appended to this report.

THOMAS MORGAN ROTCH,
Medical Director.

THE OUT-PATIENT DEPARTMENT.

This department of the Hospital is increasing every year in importance and usefulness, and is practically self-supporting. During the past year there were over eleven thousand visits, including over two thousand new patients.

Medical and surgical cases not requiring hospital care are received for treatment daily from 9 to 11 A.M. (Sundays and holidays excepted). Cases for admission to the Hospital should be referred to the Out-Patient Physician during these hours.

Emergency cases will be admitted at any time if there is an existing vacancy. Questions in regard to such cases, and other matters of information, may be referred by telephone to the Hospital at any time.

The following tables represent the Medical and Surgical work done in the Out-Patient Department :—

JANUARY 1, 1905, TO JANUARY 1, 1906.

BOSTON.
Press of David Clapp & Son.

The Thomas Morgan Rotch Jr. Memorial Hospital is a Hospital devoted to the medical and surgical treatment of infants

The patients taken care of in the hospital wards are under two years of age. The admission of patients is not confined to residents of Boston. Other children under twelve years of age are treated in the Out-Patient Department.

A Post-graduate course of instruction for nurses is given at the Hospital by the Hospital Staff.

The Hospital gives a course of instruction to Nursery Maids, in the care of infants.

Relatives are admitted to the wards on Sunday from ten to twelve o'clock.

REPORT OF THE MEDICAL DIRECTOR.

During the past year 271 infants have been admitted to the wards, and 2711 new patients have been treated in the Out patient Department. This however does not represent the great extent of the work which is carried on in the inadequate quarters allotted to the out-patients. This can only be shown by the number of visits which has increased from 11637 in 1904 to 12745 in 1905. These figures are very significant as emphasizing the fact that a hospital for infants is much needed in our community, and that this need is shown by the number of beds in the wards being too small to accommodate all who apply for entrance, while where expansion is possible it is shown in the extra 1108 visits of out-patients, as contrasted with the 723 increase recorded for 1904.

What should especially be dwelt upon in this report is that while considerable extra expense has been incurred from having to provide fire escapes in accordance with the law, it is still very evident that our income does not cover our expenses by over $1200. There is no question but that the hospital is carrying on a very important work and one which is not being done elsewhere. It is perhaps not generally known that the expense of caring for babies is far greater than for adults and much greater than for children. The amount which has to be expended on washing and for nurses alone is, in an infant hospital, so much beyond what is usually recognized as sufficient for ordinary hospitals, that it almost precludes a proper amount of attention and care when infants are treated with older patients. For this reason it is imperative that our work should be carried on separately, and that those who are interested in saving life at the time when it is most important and difficult to do so, should make an effort to increase the general income by increasing the number of yearly subscribers.

Our institution is at present in a stage of crisis and change, and unless a large endowment is obtained so that its twenty-four years of valuable increasing work can be carried on and amplified, a serious blow will be given to the advancement of our knowledge of the diseases of early life, and to the reduction of the great mortality which is so marked in infants as contrasted with children and adults.

The Directors offer their thanks to the men and women who have in the past year made it possible by the annual fair to meet the expenses, which must necessarily be incurred if babies are to be cared for properly. They appreciate the efforts which these devoted friends of the Hospital have made, and would wish to see these efforts supplemented by an endowment fund which would make their work in the future less burdensome.

The present position of the institution is that the land for the new Hospital has been purchased and paid for : that the sum which is held in trust for the building of the Hospital is not sufficient by from $40,000 to $50,000 for building, and that even if the Hospital could be built, an endowment which would yield at least $10,000 to $12,000 a year would be required in addition to the present invested funds, to run the new building. The Directors have thought that this statement should be made to the Corporation and possibly to the public in order that it should be known with what difficulties the great humanitarian and scientific work of the hospital is surrounded.

It is with sincere regret that we mention the deaths of a number of friends of the Hospital, and subscribers to the annual fund for income. Mrs. Henry Callender, Mrs. George Burgess, Mrs. Richard Cary, Mrs. F. B. Greene, Miss Elsie Dexter, Mr. George Thatcher, and Mr. Francis Skinner, have all died during the past year.

The work in the two schools for nursing has been carried on with its usual success and ten graduate nurses and twelve nursery maids have received diplomas. This part of the Hospital work has proved year by year to be of great service to the public, and the waiting list for those who wish to obtain the services of our nursery maids is always large.

The Directors wish to acknowledge the great assistance given by the Ladies Aid Society in contributing as they do so liberally to the supplies for the Hospital, and to offer their thanks to them.

The Directors, in recognizing and thanking the regular Medical and Surgical staff for their services, wish to especially mention two gentlemen who have voluntarily and without appointment helped to fill out vacancies in the Out-patient Department ; this work has been done in the most satisfactory manner by Dr. Henry Ingersoll Bowditch and Dr. James R. Torbert ; and they also wish to thank Dr. Max Sturnick for his kindly help at various times.

In October, 1905, Miss Mary A. Jones, who has filled so admirably the position of Director of Nurses for six years, resigned in order to take up private nursing. Miss Jones' work has been marked not only by absolute devotion to the hospital interests, but by the most unusual executive ability and intelligent understanding of a very difficult problem. We incur a great loss by her resignation,

and can only tell her how we all appreciate what she has done, and how much we regret that she cannot continue this especial work. Miss Fairbrother, who is admirably fitted from her experience as Head Nurse, has been appointed in Miss Jones' place and is managing the Hospital efficiently.

The Directors finally cannot praise too highly the care and devotion to her work shown with unflagging interest for twelve years by Miss Aubin. No other person connected with the institution understands and does so much to regulate the rather complicated details of the Hospital.

The list of diseases treated in the wards and in the Out-patient Department is appended to this report.

THOMAS MORGAN ROTCH,
Medical Director.

THE OUT-PATIENT DEPARTMENT.

This department of the Hospital is increasing every year in importance and usefulness, and is practically self-supporting. During the past year there were over twelve thousand visits, an increase of 1108 visits, including over two thousand new patients.

Medical and surgical cases not requiring hospital care are received for treatment daily from 9 to 11 A.M. (Sundays and holidays excepted). Cases for admission to the Hospital should be referred to the Out-Patient Physician during these hours.

Emergency cases will be admitted at any time if there is an existing vacancy. Questions in regard to such cases, and other matters of information, may be referred by telephone to the Hospital at any time.
